2012 petition decisions:

4/18/12 Diamond Shamrock, Sunray TX Petition for reissuance
completed by Ken, Bill and Arnold
5/24/12 Ascend Performance Materials Operations LLC, Alvin, TX
Nonsubstantive revision by Brian
8/20/12 Cornerstone Chemical Company, Waggaman, LA Petition for
reissuance completed by Ken

2012 training:

R6 UIC STAFF PROVIDED TECHNICAL UIC TRAINING TO OCC, R7 AND BY WEBINAR: During September, Region 6 staff provided 2 days of technical training to OCC and 3½ days of technical training on six UIC modules covering pressure transient testing, production logging, step rate test design and analysis, hydraulic fracturing occurrence in injection wells, seismicity related to disposal wells, and area of review calculations. Region 6 staff national expertise, obtained from years of specialized oil and gas industry petroleum engineering and no migration petition regulatory experience, is directly applicable to Class I, II, V, and VI injection wells. Region 6 Land Ban staff previously identified the training needs and developed the training modules internally over the last decade. Training modules are updated as new engineering analysis techniques are noted in industry and research literature. In all, twenty five UIC staff from R7, R4, and environmental agencies from OK, KS, NE, and MO attended the training sessions in person. Additionally, webinar participants included UIC staff from EPA HQ and Regions 2, 3, 5, 8 & 9. **Susie McKenzie, 665-7198; Ken Johnson, 665-8473**
